

Walks Manager Webmaster Report for SEBR AGM November 2026

SEBR Website

After some initial training from Brian, I took over running the website towards the end of October 2025. The management of the website does require some IT knowledge but Ramblers-Webs do have an effective support system if help is required.

The website is automatically linked to Walks Manager which all walk leaders are using to enter their own walks.

The website content probably needs a review to see what is still relevant and maybe look to add new content to make it more engaging for visitors.

Walks Manager

As far as Walks Manager is concerned, this is also running smoothly with walk leaders entering their own walks which I have been checking and publishing along with an appropriate photo.

Unfortunately, Walks Manager does not notify me if a walk has been entered which needs publishing, so I have to check frequently to make sure all walks are published as quickly as possible. Some walk leaders do notify me that they have entered a walk for review which is very helpful.

Brian continues to act as a backup when I am unavailable.

Mark Purnell – November 2026
